

DEEPANA BALMOOR

Backend Engineer | Java | Microservices | Distributed Systems

Hyderabad, India | +91-9542111825 | deepanabalmoor7@gmail.com

GitHub: github.com/dbalmoor | LinkedIn: linkedin.com/in/deepanabalmoor/

PROFESSIONAL SUMMARY

Backend Engineer with 2+ years of experience developing and supporting backend services, APIs, and distributed applications. Experienced in Java, PostgreSQL, asynchronous messaging, caching, Docker, and OpenShift environments. Worked directly with international clients on mission-critical systems, contributing across development, testing, deployment, and production support. Strong foundation in data structures, algorithms, object-oriented design, databases, and distributed systems, with hands-on experience building microservices-based solutions and event-driven applications.

TECHNICAL SKILLS

Languages: Java, SQL, Python, C++

Backend: Spring Boot, Spring MVC, REST APIs, JDBC, JPA/Hibernate, Microservices

Messaging: JMS, EMS, Apache Kafka, Event-Driven Architecture

Databases: PostgreSQL, Oracle, MySQL, MongoDB

Caching: Redis, TIBCO ActiveSpaces

DevOps: Docker, OpenShift, Kubernetes, CI/CD, Linux

Testing & Monitoring: JUnit, Mockito, Postman, Grafana, Elastic

Tools: Git, GitHub, Maven, Swagger/OpenAPI

PROFESSIONAL EXPERIENCE

Software Engineer | Tech Mahindra | Aug 2024 – Present

Client: Indosat Ooredoo Hutchison (IOH), Indonesia

Project: DMP Consolidation

- Developed and maintained integration services using TIBCO BWCE and Flogo for the DMP Consolidation platform.
- Built REST and SOAP integrations between enterprise applications, databases, and external systems.
- Developed JMS/EMS-based message processing flows for asynchronous communication between distributed applications.
- Integrated PostgreSQL and Oracle databases for data synchronization and business transactions.
- Implemented ActiveSpaces caching for frequently accessed data to reduce database dependency.

- Designed REST APIs for inter-service communication and implemented resilient failure handling using retries and compensating transactions.
- Containerized applications using Docker and deployed them on OpenShift environments.
- Supported SIT, UAT, and production deployments, including defect analysis and issue resolution.
- Investigated production issues using Elastic logs and Grafana dashboards.
- Worked closely with client and testing teams during releases and production support activities.

INTERNATIONAL ON-SITE EXPERIENCE – INDOSAT OOREDOO HUTCHISON (IOH), JAKARTA, INDONESIA

Apr 2026 – May 2026 | Aug 2026 – Sept 2026

- Represented the offshore engineering team during onsite migration and go-live activities for the DMP Consolidation platform.
- Supported multiple large-scale subscriber migration events involving over 40 million subscriber records across migration waves.
- Participated in migration validation, production readiness checks, and post-migration verification activities to ensure data integrity and service continuity.
- Worked closely with business stakeholders, QA teams, and client engineers during critical production rollout phases.
- Monitored production systems during go-live windows, investigated issues, and coordinated resolution efforts with onsite and offshore teams.
- Supported SIT, UAT, production deployment validation, and post-release stabilization activities across multiple environments.
- Facilitated communication between client stakeholders and offshore development teams to ensure timely resolution of migration and production issues.

ACHIEVEMENTS

Received the 'Pat on the Back' Award for delivering critical project modules under aggressive timelines while maintaining quality and production stability.

PROJECTS

Distributed Order Management System | Java, Spring Boot, Kafka, PostgreSQL, Docker

- Designed a distributed microservices platform using Saga Orchestration for Order, Inventory, and Payment workflows.
- Implemented event-driven communication using Apache Kafka.
- Built idempotent message processing, retry strategies, and Dead Letter Queue handling.
- Implemented optimistic locking and distributed tracing using MDC correlation IDs.
- Applied eventual consistency patterns and compensating transactions.

Personal Portfolio Website | Next.js, React, TypeScript

Link: <https://deepana-portfolio.vercel.app/>

- Designed and deployed a responsive portfolio website showcasing backend engineering projects and skills.

EDUCATION

B.Tech – Information Technology, Geethanjali College of Engineering and Technology
(2020–2024) | CGPA: 8.94
